

Overview of Statistical Analysis

Nathaniel Yomogida, SPT Chloë Kerstein, SPT

Table of contents

1	Why should you care about statistical analysis?	1
2	Comparing Tests	1
2.1	T-Test	1
2.2	Mann-Whitney U Test	2

1 Why should you care about statistical analysis?

A study's results are useless if the wrong data analysis test is used Allam (2017)¹ found that only 24.5% of studies performed for MD doctoral dissertations at the National Cancer Institute (NCI) used improper data tests¹

- Most of results were misinterpreted (82.3%)¹
- Misuse of statistical terminology (77.4%)¹

2 Comparing Tests

2.1 T-Test

T-Test

- Determines difference from in mean values between 2 groups

2.2 Mann-Whitney U Test

See [Mann-Whitney U Test](#)

- Difference in Rank sum
 - Does not need to be normally distributed
 - 2x independent groups
