

Sternocleidomastoid muscle (SCM)

Nathaniel Yomogida, SPT

Chloë Kerstein, SPT

Table of contents

1 OIAN	1
1.1 Origin	2
1.2 Insertion	2
1.3 Innervation	2
1.4 Action	2
2 Muscle groups	2
3 Palpation	2
Clinical significance	2

1 OIAN

Table 1: Sternocleidomastoid OIAN

Muscle	Origin	Insertion	Nerve	Action
Sternocleidomastoid	Sternal head: sternum (manubrium); Clavicular head: Clavicle (medial 1/3)	Temporal bone (mastoid process); Occipital bone (superior nuchal line)	Motor: CN XI Accessory n. and Proprioception: Cervical plexus (C2, C3, C4)	Unilateral: Tilts head to same side, rotates head to opposite side; Bilateral: Extends head, aids in respiration when head is fixed

1.1 Origin

- Sternal head: [sternum \(manubrium\)](#)¹
- Clavicular head: [Clavicle \(medial 1/3\)](#)¹

1.2 Insertion

- [Temporal bone \(mastoid process\)](#)¹
- [Occipital bone \(superior nuchal line\)](#)¹

1.3 Innervation

Motor: [CN XI Accessory n.](#) and **Proprioception:** [Cervical plexus \(C2, C3, C4\)](#)¹

1.4 Action

- **Unilateral:** [Tilts head to same side, C/L head rotation](#)¹
- **Bilateral:** Extends head, aids in [respiration](#) when head is fixed¹

2 Muscle groups

The sternocleidomastoid is part of the [Superficial neck muscle group](#)

3 Palpation

Clinical significance

1. Gilroy AM, MacPherson BR, Wikenheiser JC, Voll MM, Wesker K, Schünke M, eds. *Atlas of Anatomy*. 4th ed. Thieme; 2020.
